SUMMARY

Aspiring Java Full Stack Developer with a strong foundation in Core Java and Object-Oriented Programming. Currently upskilling in Spring Boot and MySQL. Proficient in front-end development using HTML, CSS, and Bootstrap. Passionate about building responsive, user-friendly applications and contributing to backend and full stack development teams.

EXPERIENCE

Techvolt Software pvt.ltd.,Coimbatore

Web Development Intern

Completed hands-on training in HTML and CSS. Built responsive web pages with structured layouts, forms, and styling. Learned semantic HTML, CSS properties, and mobile-first design. Practiced real-time UI development and basic front-end concepts.

Self-Learning / Online Platform (Great Learning)

Online Java Programming Course

Completed a Core Java course covering syntax, object-oriented programming, and basic logic building. Learned concepts such as classes, objects, inheritance, polymorphism, encapsulation, and interfaces. Applied programming skills through small practice tasks and examples.

PROJECTS

TrendHive – Static Website

🔗 <https://malarvizhi2004.github.io/Trendhive---pro/>

Designed a basic static website using HTML and CSS. Created multiple pages such as the homepage, services, and categories. Focused on layout structure, text formatting, and hover effects. Practiced using standard HTML tags and CSS styling for clean page design.

Smart City Transport System – Java Console Application

🔗 <https://malarvizhi2004.github.io/javaconsole/>

Developed a text-based transport management system using Core Java and OOP concepts. Implemented features like transport listing, user input handling, and simple booking. Applied object-oriented principles such as classes, inheritance, and encapsulation for modular design.

Bootstrap Landing Page – Responsive Web Design

🔗 <https://malarvizhi2004.github.io/Bootstrap-project/>

Designed a fully responsive landing page with Bootstrap 5. Integrated Font Awesome icons and styled multiple sections: Navbar, Hero, Cards, Footer. Emphasized mobile-first and component-based design.

Minease – Personal Wellness & Entertainment Web App

🔗 <https://malarvizhi2004.github.io/MindEase/>

Developed a responsive web app using HTML, CSS, and JavaScript focused on mindfulness, productivity, and entertainment. Integrated calendar and analytics features to track habits and routines. Included modules for games, meditation, music, and video playback to enhance user engagement. Designed with a clean UI/UX to ensure accessibility and ease of use across devices.

EDUCATION

INFORMATION TECHNOLOGY

Excel Engineering College(Namakkal)

GPA **8.19** / 10

⌚ 2021 - 2025

HSC

Government Higher Secondary School (Athani, Erode-638502)

GPA **8.9** / 10

⌚ 2020 - 2021

SSLC

Government Higher Secondary School(Athani, Erode-638502)

GPA **8.2** / 10

⌚ 2020 - 2021

SKILLS

Programming:

Core Java (OOPs), JavaScript

Web Development:

HTML5, CSS3, Responsive Design

Frameworks & Tools:

Spring Boot (Learning), Bootstrap 5, IntelliJ IDEA, Eclipse, VS Code

Database & Version Control:

MySQL (Learning), Git & GitHub

Testing Tool

Junit(Basic)

CERTIFICATE

Web Design – Technova 2K23, National Level Symposium

Java Programming for Beginners – Great Learning (Online)

Web Development Training(Techvolt Software Pvt. Ltd., Coimbatore)
